

VAIBHAVI HAMBIRE

Data & Insights Specialist

Mumbai, Maharashtra | hambirevaibhavi21@gmail.com | linkedin.com/in/vaibhavi-hambire | github.com/Vaibhavihambire

PROFILE SUMMARY

Results-oriented Data & Insights Specialist with a B.E. in Information Technology (CGPA 8.5) spanning analytics, BI, and Python-based engineering. Builds Power BI dashboards (DAX, Power Query), writes SQL for large-scale analysis, automates ETL pipelines, and deploys ML and OCR-based systems. Internship-backed delivery at Tata Steel and x-Biz Techventures, with a published research paper on an ML pipeline. Adaptable across Data Analyst, Python Developer, Power BI Developer, and ML/Data Science roles.

CORE COMPETENCIES

- Analytics & BI: Power BI, DAX, Power Query, Data Modeling, Star Schema, KPI Reporting, Interactive Dashboards
- Data & Reporting: SQL Server, MySQL, Data Cleaning & Validation, Joins, CTEs, Window Functions, ETL, Excel
- Programming: Python (Pandas, NumPy, Matplotlib, Scikit-learn, XGBoost), Flask, Django REST Framework
- AI / ML: OCR Pipelines, YOLO, OpenCV, Feature Engineering, Predictive Modeling, Association Rule Mining
- Tools: Docker, Git, GitHub, Postman, Jupyter Notebook

PROFESSIONAL EXPERIENCE

Python Developer Intern — x-Biz Techventures Pvt. Ltd., Mumbai

Dec 2025 – Feb 2026

- Engineered OCR-based document processing pipelines using Python, YOLO, and OpenCV; automated structured data extraction from unstructured inputs, reducing manual effort by ~60%.
- Containerized AI pipeline services with Docker and maintained a version-controlled codebase via Git for reproducible team deployments.

Data Analyst Intern — Tata Steel Ltd., Boisar

Dec 2023 – Jan 2024

- Processed and analyzed 74,000+ operational records using Python (Pandas, Matplotlib); delivered a structured KPI insight report adopted by management for quarterly decision-making.
- Performed end-to-end data cleaning, validation, and transformation on manufacturing and operations data, ensuring quality and consistency.

Full Stack Developer Intern — BARC, Tarapur

Jun 2023 – Jul 2023

- Built a PHP Yii2 (MVC) + MySQL financial management system for an R&D facility, reducing manual tracking time by 80% through backend automation and normalized schema design.

KEY PROJECTS

IngreScan — Food Label Risk Analyzer | Python, XGBoost, OCR, Flask, React Native

- Full ML pipeline: OCR extraction → data cleaning → feature engineering → XGBoost classifier (89% accuracy) → Flask REST API → React Native frontend.

Indian Document OCR API | Python, Flask, Tesseract, EasyOCR, PaddleOCR

- Built a multi-engine OCR API for Aadhaar, PAN, and other Indian documents, with preprocessing for blur, skew, and low light, returning results from three OCR engines in one response.

Ola Ride Data Analysis | SQL Server, Power BI, DAX, Power Query

- Analyzed 100,000+ ride records via SQL Server (CTEs, window functions); built interactive Power BI dashboards with dynamic slicers and drill-through filters across 5 report pages.

Sales Analysis Dashboard | Power BI, DAX, Excel

- Built a 3-page Power BI dashboard on a ~10,000-row retail dataset, using DAX measures for YoY growth, profit margin, and product/region ranking.

Job Skill Recommendation System | Python, Apriori (mlxtend), Streamlit

- Mined 10,000+ job postings and normalized 200+ skills using Apriori association rule mining; deployed as an interactive Streamlit recommendation app.

CERTIFICATIONS & PUBLICATIONS

- Data Visualization with Python — Kaggle (Mar 2025)
- SQL & Relational Databases 101 — CognitiveClass.ai / IBM (Jul 2024)
- Python for Data Science — NPTEL / IIT (Apr 2023)
- "Ingrescan: Smart Food Ingredient Analyzer" — International Research Journal of Modernization in Engineering Technology and Science (Apr 2025)

EDUCATION

B.E. – Information Technology — St. John College of Engineering & Management | CGPA: 8.5 / 10 | May 2025
